

TRY ME!

Game Design Document (GDD)

1. Game Overview

Game Title: Try Me

Genre: Ragebait

Game Elements

List the primary activities the player performs for fun.

- Platforming
- Puzzle Solving
- Obstacle Avoidance
- Precision Movement
- Trial-and-Error Challenges

Number of Players: Single Player

2. Technical Specifications

Camera View: Side Scrolling

Platforms: PC

Programming Language: C#

3. Gameplay

Gameplay Description

This game is about avoiding obstacles, within or without the bounds of time, and is meant to be an improvement on the already existing ragebait game of "Level Devil". The player shall move

from its starting position to an end goal, while avoiding certain death, traps, and hidden easter eggs.

4. GAMEPLAY OUTLINE

Opening the Game Application

- Splash screen
- Main menu

Game Options

- Start Game
- Instructions
- Credits
- Easter Eggs page (to access a list of easter eggs, a user has to type a particular string in the menu to access the easter eggs page)
- Settings
- Quit

Core Game Elements

- Jumping
- Running
- Dodging
- Climbing
- Interacting with Objects (traps etc.)

Game Levels

Describe each level and its unique challenges.

Level 1

This is meant to train the user; and is supposed to be fairly simple and shall give the user a taste of what is to come.

Level 2

This is where the fun begins! The player must complete this stage within the set time with a set number of obstacles

Level 3

This is built upon the previous level, but with a different layout, more traps, and less time. This can be seen as the final level.

Player Controls: W,A,D for standard movement etc. Since there is no functionality of crouch, the S key is not used.

Winning Conditions: The player wins when the player reaches the set end point without exhausting lives and within the given time.

Losing Conditions: The player runs out of time or exhausts his lives.

Why Is This Fun?

This is not fun but aims to challenge the player by making use of the simplicity of the game and the human ego.

5. KEY FEATURES

- Challenging ragebait gameplay
- Unexpected obstacles
- Skill-based progression
- Humorous failures
- Fast restarts
- Unique level designs
- Achievement system

6. GAME FLOWCHART
